CURRICULUM AND SYLLABI

FOR

MASTER OF BUSINESS ADMINISTRATION

(For the batch admitted in 2022– 2023)

R2022

Accredited by NAAC A++ grade,
Approved by AICTE, Affiliated to Anna University, Chennai.

KSR Kalvi Nagar, Tiruchengode – 637 215.
Namakkal District, Tamil Nadu, India.

## Department of Master of Business Administration

VISION

To be recognized as a provider of a learning environment that nurtures the infinite potential of individuals to be future professional managers who are rooted in ethics and driven by environmental and social consciousness.

MISSION

- To nurture future professional managers competent to work in different sectors in urban and rural areas
- To equip students with entrepreneurial skills with a global mindset
- To focus on excellence in academic and industry-based research
- To inculcate professional ethics, commitment, and integrity
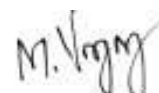

PROGRAMME EDUCATIONAL OBJECTIVES: MBA

I. Successful Management Professional: The graduates will be successful management professionals with higher order of business and entrepreneurial skills facilitating a promising career in the various management domains.

II. Professional Competence: The graduates will have professional competence for astute decision-making, research, organization skills, planning, and its efficient implementation.

III. Team Player: The graduates will have team player qualities to handle diversity and the leadership skills to make optimal decisions with people of cross-cultural attributes

IV. Responsible Citizens: The graduates will be responsible citizens with ethical conduct to empower the business organizations with high integrity, and moral values

M. Vogny

BoS Chairman Signature

PROGRAMME OUTCOMES

1. Apply knowledge of management theories and practices to solve business problems.

2. Foster Analytical and critical thinking abilities for data-based decision-making.

3. Ability to develop Value based Leadership ability.

4. Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of the business.

5. Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment

6. Ability to develop entrepreneurial thinking and business acumen

BoS Chairman Signature

MAPPING OF PROGRAMME EDUCATIONAL OBJECTIVES (PEOs) WITH PROGRAMME OUTCOMES (POs)
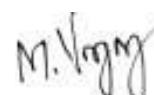

The Master of Business Administration Programme outcomes leading to the achievement of the objectives are summarized in the following Table.

Programme Educational Objectives	Programme Outcomes					
	PO1	PO2	PO3	PO4	PO5	PO6
PEO1	3	3	2	2	2	2
PEO2	3	3	3	2	3	3
PEO3	3	3	3	3	3	3
PEO4	3	2	3	2	2	3

Contributions:1-low,2- medium,3-high

60 MB102	**Managerial Economics**	Category	L	T	P	Credit
		PC	3	0	0	3

Objective

- To study the basic concepts of managerial economics
- To know about the economic principles in business decisions
- To teach about demand, supply, production and cost analysis
- To gain knowledge towards various market structure in macro economy
- To assess the ability of consumer, firm, market and economy for better decision making.

Prerequisite

NIL

Course Outcomes

On the successful completion of the course, students will be able to
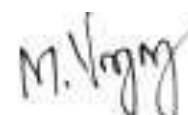

CO1	Understand the basic concepts of managerial economics	Understand
CO2	Apply the economic principles in business decisions.	Apply
CO3	Interpret the demand, supply, production and cost analysis	Apply
CO4	Interpret the various market structure in macro economy.	Apply
CO5	Examine the macro-economic variables to improve economic growth.	Analyze

60 MB 1P2	Data Analytics Lab - I	Category	L	T	P	Credit
		PC	0	0	4	2

Objective

- To know about the mathematical formulas and function in MS-Excel
- To learn about sorting, filtering and formatting function in MS-Excel
- To understand the usage of conditional statements in MS-Excel
- To work out the descriptive statistics in MS-Excel
- To apply multivariate analysis in MS-Excel

Prerequisite

NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the various functions and formulas for applying mathematical and text calculations in Spread Sheet.	Understand
CO2	Understand about using various functions like sorting, filtering, freezing and conditional formatting in Spread Sheet	Understand
CO3	Apply the payroll system for business organizations using conditional syntax and pivot table in Spread Sheet.	Apply
CO4	Apply various calculations like Mean, Median, Mode, Standard Deviation and Frequency Table using Excel	Apply
CO5	Analyze the multivariate analysis in business operations using Excel.	Analyze

Mapping with Programme Outcomes

CO1	3			2		
CO2	3		3			
CO3		3	3			
CO4		3				
CO5		3		3	3	

Assessment Pattern

Internal: No Continuous Assessment test will be conducted
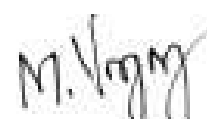

Students performance will be assessed in the classroom as given below:

Logical Test : Understanding of the problem given and executing the exercise : 40 marks

Run Test: Displaying the output for the exercise : 20 marks

**External:** Practical Lab Exam : 30 Marks

Record Book/ Viva Voce: 10 Marks

List of Experiments

- Using sorting and filtering functions in Spread Sheet.

- Using freezing and conditional formatting functions in Spread Sheet.

- Calculate net pay and Income tax of the employee using conditional statements in Spread Sheet.

- Applying basic mathematical functions using Spread Sheet

- Create a report with the PivotTable and PivotChart Wizard.

- Applying of what-if-analysis function using Spread Sheet.

- Using VLOOK-UP and HLOOK-UP functions

- Applying Correlation co-efficient using Spread Sheet

- Applying ANOVA co-efficient using Spread Sheet

- Applying Regression co-efficient using Spread Sheet

60 MB 205	Applied Operations Research	Category	L	T	P	Credit
		PC	3	1	0	4

Objective

- To learn about linear programming method
- To apply transportation models and assignment model to minimize the cost of investment
- To understand the application of sequencing model
- To understand the application of queuing techniques in business situations
- To understand the application of replacement models

.Prerequisite

Business Statics and Analytics

Course Outcomes

On the successful completion of the course, students will be able to
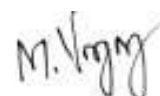

CO1	Apply linear programming techniques to optimize the business problem.	Apply
CO2	Apply transportation models and assignment model to optimize the resource to enhance operational efficiency.	Apply
CO3	Apply sequencing models to reduce elapsed time and networkscheduling to minimize the project completion duration.	Apply
CO4	Apply decision models and game theory techniques in business situations fordecision making.	Apply
CO5	Analyze the duration for replacement of equipment's using replacement models.	Analyze

Objective

- To learn the basic concepts of management
- To learn the concepts of Organization and leadership
- To learn the concepts of Planning and Strategy Formulation
- To learn the concepts of Risk and stress management
- To learn the concepts of Crisis management and work force diversity

Prerequisite

Business Communication

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the basic concepts of management	Understand
CO2	Interpret the concepts of Organization and leadership	Apply
CO3	Analyze the concepts of Planning and Strategy Formulation	Analyze
CO4	Apply the concepts of Risk and stress management	Apply
CO5	Analyze the concepts of Crisis management and work force diversity	Analyze

		PC	0	0	4	2

Objective

- To understand about the basic operations of SPSS
- To learn the business operations using SPSS
- To apply measures of central tendency and dispersion tool in SPSS
- To apply various test for significance in SPSS
- To apply the multivariate analysis using SPSS

Prerequisite

Data Analytics Lab - I

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand about the basic operations of the statistical package SPSS	Understand
CO2	Analyze data using various test for significance in SPSS	Analyze
CO3	Analyze the multivariate analysis in business operations using SPSS	Analyze
CO4	Create the report data using Power BI	Create
CO5	Apply the power query, pivot and view	Apply

Objective

- To enable the students to understand the concept of Strategic Management
- To familiarize the importance of competitive advantage
- To help the students to understand formulation, analysis and implementation in a corporate environment
- To provide the knowledge on Designing Strategic Control Systems
- To understand the recent trends in strategic management

Prerequisite

NIL

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Classify the basic concept of strategy and strategic management process, vision, mission and major goals.	Understand
CO2	Examine the core competency, building blocks and durability of competitive advantage, avoiding failure and sustaining competitiveadvantage.	Analyze
CO3	Analyze the internal environment by using SWOT and external environment by using five forces model and environment threat and opportunity profile.	Analyze
CO4	Support the designing of organizational structure, strategic control system for change process.	Evaluate
CO5	Interpret the recent trends in strategic management	Apply

60 MB 3F1	Security Analysis and Portfolio Management	Category	L	T	P	Credit
		PE	3	0	0	3

Objective

- To provide the students a comprehensive knowledge on investment in Stock Trading.
- To teach the students the advanced investment tools and techniques available for analyzing the securities and portfolio management.
- To provide a practical approach in stock market operations and understand the relationship between risk and return on investment.
- To help the students to make an investment decision in a less risky approach.
- To prepare students for a prospective career in the field of stock trading, Entrepreneurship and other financial services sector

Prerequisite

Financial Management

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Understand the basic of Indian securities market and different terminologies used in equity and debt markets	Understand
CO2	Interpret the market regulators and various participants in thesecurities market	Apply
CO3	Interpret various fundamental analysis techniques towards stock investment.	Apply
CO4	Examine the basics of technical analysis and various indicators forshort term trading.	Analyze
CO5	Evaluate the portfolio methods, construction, and evaluation	Evaluate

III	3	0	0	45	3	40	60	100

Introduction to Strategic HRM **[9]**

Strategic HRM and corporate strategy - Challenges in SHRM - Role of Strategic HR in Merger and Acquisition.

HRP, Design & Implementation of Strategic HRM **[9]**

Human Resource Planning - Design and redesign of work systems - Organizational culture - Motivation of human resources – Staffing - Performance management and feedback.

Strategic Pay and Employee Relation **[9]**

Impact of organizational Restructuring on Human resources - Compensation / Bench Marking - Labor relations - Employee Separation.

General Strategic HRM **[9]**

Global Human Resources Management - Corporate Ethics and Values - Strategies for nurturing employee engagement - Contemporary Issues in SHRM – Leadership.

Changing Environment of HRM **[9]**

Internal and External factors: Internal factors – Human Resource of Country, changing demands of employers , employees organization . External factors – Change in Technology, Legal and Government, Customer Social factors, Economic and Political factors.

		PE	3	0	0	3

Objective

- To make the students to know about the concepts of change management.
- To give the knowledge on the Process of Change Management.
- To enable the students to know about the Communicating Change in change management.
- To give the knowledge on Resistance to change
- To give knowledge on Developing and implementation plan on change management

Prerequisite

Human Resources Management

Course Outcomes

On the successful completion of the course, students will be able to
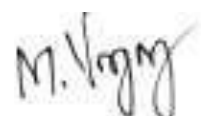

| CO1	Understand an insights to concepts in change management.	Understand
CO2	Relate the process with control for change management.	Analyze
CO3	Interpret the need for communicating change, methods, techniquesand role of top management.	Apply
CO4	Examine the techniques of resistance to change.	Analyze
CO5	Interpret the plan, types and implementing change.	Apply

		PE	3	0	0	3

Objective

- To explore contemporary knowledge and gain a conceptual understanding of Quality Management.
- To gain knowledge regarding principles and philosophies of TQM.
- To provide knowledge to understand the concept of costs.
- To know about various tools used for Quality Management
- To provide knowledge about the recent trends for maintaining Quality systems

Prerequisite

Production Management

Course Outcomes

On the successful completion of the course, students will be able to

| CO1	Understand the basic concepts of TQM, Cost and tools for Quality Management	Understand
CO2	Implement of TQM framework and stages for Continuous Improvement	Apply
CO3	Analyze the cost of quality to minimize the expenses and maximize service quality.	Analyze
CO4	Apply various quality tools to enhance the process effiency of product service.	Apply
CO5	Illustrate the concepts of recent trends in Quality systems	Understand

60 MB 3O2	**Production Planning and Control**	Category	L	T	P	Credit
		PE	3	0	0	3

Objective

- To know about the basic concepts of forecasting techniques in business.
- To provide knowledge about effective capacity planning and capacity measurement of the equipment.
- It provides knowledge in different aggregate planning strategies for improving productivity of the firm.
- To know the basic concepts of scheduling and dispatch techniques.
- To understand the concept of group technology, coding and classification of parts.

.Prerequisite

Production Management

Course Outcomes

On the successful completion of the course, students will be able to
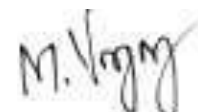

| CO1	Apply forecasting techniques inreal world business.	Understand
CO2	Understand the concept of Capacity Planning and its factors.	Understand
CO3	Apply aggregate planning strategies for productivity improvement.	Apply
CO4	Implement scheduling and dispatching techniques in manufacturing to optimize productions process.	Apply
CO5	Apply Group Technology to optimize production process	Apply

		PE	3	0	0	3

Objective

- To enable the students in understanding fundamentals of Supply Chain Aanalytics
- To understand the Supply chain Procurement planning.
- To make the students apply the concept of Demand fulfilment
- To enhance the knowledge in Supply chain integration
- To facilitate the application knowledge in simulation and Design of Experiments.

Prerequisite

Production Management, Operations Research

Course Outcomes

On the successful completion of the course, students will be able to

CO1	Outline the Principles of demand planning.	Understand
CO2	Illustrate the concept of Supply chain and procurement planning.	Apply
CO3	Describe the concept of Demand Fulfillment.	Understand
CO4	Appraise the concept of Supply chain integration.	Analyze
CO5	Demonstrate Simulation and DOE in supply chain..	Apply

60 MB 3O5	Technology Management	Category	L	T	P	Credit
		PE	3	0	0	3

Objective

- To know about the basic concepts of forecasting techniques in business.
- To provide knowledge about effective capacity planning and capacity measurement of the equipment.
- It provides knowledge in different aggregate planning strategies for improving productivity of the firm.
- To know the basic concepts of scheduling and dispatch techniques.
- To understand the concept of group technology, coding and classification of parts.

Prerequisite

Production Management

Course Outcomes

On the successful completion of the course, students will be able to
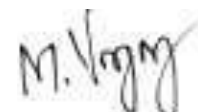

| CO1	Outline the basic concepts of Technology management.	Understand
CO2	Illustrate the concept of forecasting.	Apply
CO3	Interpret decision making techniques.	Understand
CO4	Describe Technology transfer and modes of global technology transfer.	Understand
CO5	Apply the concept of Intellectual Property Rights.	Apply

Objective

- To enable the students to understand the basics about competency mapping
- To develop and understanding the Competency Categories
- To make the students to understand the Competency Identification
- To give the knowledge on Competency Assessment
- To provide theoretical and application-oriented inputs of Competency Mapping.

Prerequisite

NIL

Course Outcomes

On the successful completion of the course, students will be able to

| CO1	Understand the basic concepts of competency mapping.	Understand
CO2	Develop the various Competency Categories	Apply
CO3	Analyze the concept Competency Identification	Analyze
CO4	Interpret the process and tools of competency assessment.	Apply
CO5	Illustrate the fields of application of competency mapping	Apply

S.No	Topic	No. of Hours
1	**Introduction**	
1.1	The role of Materials Management in Business	3
1.2	Purchasing and its Role in Business	3
1.3	Purchasing & Quality Sources of Supply	3
2	**Sourcing**	
2.1	International Buying & Importance	2
2.2	Global sourcing & Global Trading	1
2.3	Green purchasing	1
2.4	EXIM Policy & Exchange Rate Management	1
2.5	Contracts & Pricing Practices	1
2.6	Negotiation - Purchase Timing	1
2.7	Make or Buy - Capital Equipment Purchase	1
2.8	Sourcing of Projects	1
3	**Material Planning**	
3.1	Strategic Material Planning	2
3.2	Materials Budgeting	2
3.3	Inventory Management	2
3.4	Approach to System Design	3
4	**Stores and Transportation**	
4.1	Stores Management	2
4.2	Insurance	2
4.3	Sales Tax	2
4.4	Transportation	2
4.5	Marine Insurance	1
5	**Recent Trends in Materials Management**	
5.1	Recent Trends in Materials Management	3
5.2	Inventory Management Policies	2
5.3	Standards and practices	2
5.4	Procedures	2
	Total	45

60 MB 4O3	Services Operations Management	Category	L	T	P	Credit
		PC	3	0	0	3

Objective

- To create an understanding about service operations methods
- To understand the concept of service operations strategies
- To facilitate the learnings about service system
- To understand service delivery and quality improvement
- To illustrate the service quality and quality control

Prerequisite

NIL

Course Outcomes

On the successful completion of the course, students will be able to

| CO1	Interpret the basic concepts of Service Operations.	Understand
CO2	Outline the Service Operations Strategies	Understand
CO3	Exhibit the concept of Service System	Apply
CO4	Examine the customer satisfaction and delivering of service	Analyze
CO5	Illustrate the Service quality and QC tools	Apply
